

YORK TOWNSHIP TRUSTEES

Public Hearing

June 4, 2007

Chairman Jane Weiland called the public hearing for the CSX R/R Improvement to order at 10:30 a.m.

Present: Colene Conley, Jane Weiland, Bev Fry, Joe O'Hara and Jenny Smetana.

Joe O'Hara from the County Engineer's Office reviewed the Improvement Project on Wolff Road (T.H. 94) through the Ohio Public Works Commission. It will also include the replacement of Culvert #9. The tentative start date is mid-July and completion date is September 28th. The township will enter into a contract with OPWC for 75% of the project total which is \$325,950. The Township's 25% share is \$108,650.

Mrs. Smetana asked that when the grade work is being done that it come past the phone pole and come on to her property. The hill is so steep that cars disappear in a portion of the hill. While there are suggested speed limit signs posted, they don't appear to be doing any good. Joe O'Hara explained that it is not a part of the scope of this project.

Colene explained to Mrs. Smetana that the historical pattern of road paving, improvements, etc. has been based upon road counts so that the road maintenance is completed in order of the most traveled roads.

Mrs. Smetana handed a copy of her proposal to Colene so it can be forwarded to Mike Salay, County Engineer for review. Colene and Jane discussed the problems with the bridge near here that has ice float and flooding issues.

There is one property owner near the project that we have had problems contacting. The letters have come back to the Engineer's Office and the Fiscal Officer.

We will receive the agreement from OPWC on July 1st and then Joe O'Hara will bring it to the trustees to sign.

Jane Weiland declared the public hearing complete at 10:57 a.m.

Jane Weiland, Chairman

Beverly Fry, Fiscal Officer
